

Binks AIRLESS 1 SPRAY GUN

(For Professional Use Only)
Model 6700-0080-0 Less Tip

OPERATION AND MAINTENANCE INSTRUCTIONS

OPERATING INSTRUCTIONS:

The following steps and recommendations should be followed to get the best results from your spray gun:

1. Connect high pressure airless fluid hose to the gun fluid inlet and tighten securely.
2. With nozzle tip removed, start pump slowly and direct spray gun into material container and pull trigger until fluid flows steadily from gun.
3. Release trigger. Install nozzle tip per safety procedure.

⚠ WARNING

UNDER NO circumstances should the spray gun be carelessly handled nor its spray (even when nozzle is removed) directed at close proximity to any part of the human body. If you spray yourself or anyone else at close range, the stream of material can puncture the skin and cause great harm (possible amputation).

4. Increase pressure of pump and test spray pattern for proper atomization.

NOTE

Excessive fluid pressure will distort the spray pattern. A simple rule to remember is "When the pattern is right, the pressure is right".

5. Spray gun distance from work surface should be at a point where maximum fan pattern is evident. This distance is normally 8 to 14 inches.
6. "Hour-glass" and "tails" on spray patterns normally indicate too low a fluid pressure for the nozzle tip orifice size, or the material is too viscous or thick.
7. Distorted spray patterns may be the result of excess fluid pressure, plugging of tip, or a worn tip.
8. Airless spray guns are either ON or OFF. You cannot "feather" with airless guns as you can with air atomized equipment.
9. Successive strokes may not require over-lapping as much as with air atomized spray because of the heavier pattern edges produced by airless spraying.
10. Spray strokes with airless spray guns will be faster because of the higher fluid output.

Your new Binks Airless 1 spray gun has been thoroughly tested before leaving the factory. No adjustment is required prior to spray operations other than installing the nozzle tip.

Part Sheet
77-2340R-7

Part
Sheet
77-2340R-8

In this part sheet, the words **WARNING**, **CAUTION** and **NOTE** are used to emphasize important safety information as follows:

⚠ WARNING
 Hazards or unsafe practices which could result in severe personal injury, death or substantial property damage.

⚠ CAUTION
 Hazards or unsafe practices which could result in minor personal injury, product or property damage.

NOTE
 Important installation, operation or maintenance information.

⚠ WARNING

Read the following warnings before using this equipment.

READ THE MANUAL
 Before operating finishing equipment, read and understand all safety, operation and maintenance information provided in the operation manual.

WEAR SAFETY GLASSES
 Failure to wear safety glasses with side shields could result in serious eye injury or blindness.

DE-ENERGIZE, DEPRESSURIZE, DISCONNECT AND LOCK OUT ALL POWER SOURCES DURING MAINTENANCE
 Failure to De-energize, disconnect and lock out all power supplies before performing equipment maintenance could cause serious injury or death.

OPERATOR TRAINING
 All personnel must be trained before operating finishing equipment.

EQUIPMENT MISUSE HAZARD
 Equipment misuse can cause the equipment to rupture, malfunction, or start unexpectedly and result in serious injury.

KEEP EQUIPMENT GUARDS IN PLACE
 Do not operate the equipment if the safety devices have been removed.

HIGH PRESSURE CONSIDERATION
 High pressure can cause serious injury. Relieve all pressure before servicing. Spray from the spray gun, hose leaks, or ruptured components can inject fluid into your body and cause extremely serious injury.

GET IMMEDIATE MEDICAL ATTENTION
 To prevent contact with the fluid, please note the following:

- Never point the gun/valve at anyone or any part of the body.
- Never put hand or fingers over the spray tip.
- Never attempt to stop or deflect fluid leaks with your hand, body, glove or rag.
- Always have the tip guard on the spray gun before spraying.
- Always ensure that the gun trigger safety operates before spraying.
- Always lock the gun trigger safety when you stop spraying.

PRESSURE RELIEF PROCEDURE
 Always follow the pressure relief procedure in the equipment instruction manual.

MEDICAL ALERT
 Any injury caused by high pressure liquid can be serious. If you are injured or even suspect an injury:

- Go to an emergency room immediately.
- Tell the doctor you suspect an injection injury.
- Show the doctor this medical information or the medical alert card provided with your airless spray equipment.
- Tell the doctor what kind of fluid you were spraying or dispensing.
- Refer to the Material Safety Data Sheet for specific information.

TOXIC FLUID & FUMES
 Hazardous fluid or toxic fumes can cause serious injury or death if splashed in the eyes or on the skin, inhaled, injected or swallowed. **LEARN** and **KNOW** the specific hazards or the fluids you are using.

WEAR RESPIRATOR
 Toxic fumes can cause serious injury or death if inhaled. Wear a respirator as recommended by the fluid and solvent manufacturer's Material Safety Data Sheet.

ELECTRIC SHOCK / GROUNDING
 Improper grounding or sparks can cause a hazardous condition and result in fire, explosion or electric shock and other serious injury.

PROJECTILE HAZARD
 You may be injured by venting liquids or gases that are released under pressure, or flying debris.

FIRE AND EXPLOSION HAZARD
 Improper equipment grounding, poor ventilation, open flame or sparks can cause hazardous conditions and result in fire or explosion and serious injury.

STATIC CHARGE
 Fluid may develop a static charge that must be dissipated through proper grounding of the equipment, objects to be sprayed and all other electrically conductive objects in the dispensing area. Improper grounding or sparks can cause a hazardous condition and result in fire, explosion or electric shock and other serious injury.

FOR FURTHER SAFETY INFORMATION REGARDING BINKS AND DEVILBISS EQUIPMENT, SEE THE GENERAL EQUIPMENT SAFETY BOOKLET (77-5300).

Binks AIRLESS 1 SPRAY GUN

NOTE
Warning information stamped on nut.

NOTE
Sapphire inserts cannot be used with Airless 1 gun.

PARTS LIST

When ordering, please specify Part No.

Binks AIRLESS 1 SPRAY GUN MAINTENANCE INSTRUCTIONS

Read and understand all warnings on page 2 before operating this equipment.

⚠ CAUTION

1. Use care when handling nozzle tips to avoid dropping.
Tips are made of tungsten carbide and are brittle.
2. Never use metal probes to clean nozzle tips.
3. Excessive fluid pressure will cause undue wear.

TO CLEAN NOZZLE TIP

1. Turn safety knob (18) 90° to disengage trigger (21).
2. Shut off power supply to pump and release pressure from gun. Remove gun from hose.
3. Remove tip guard assembly (1), nozzle tip and gasket (2).
4. Submerge nozzle tip in solvent to remove dry coating.
5. Blow air through nozzle from front end to eject stuck particles. Hold up to light to assure orifice is clear.
6. Reassemble in reverse order.

NOTE

Use of diffuser/filter assembly will eliminate most tip clogging problems.

TO REPLACE CARTRIDGE ASSEMBLY (11)

1. Shut off power supply to pump and release pressure from gun. Remove gun from hose.
2. Remove screw (19), safety knob (18) and guide (17).
3. Unscrew gland nut.
4. Pull cartridge assembly (11) out from back of gun.
5. Make sure inside of gun is clean.
6. Reinsert cartridge assembly (11) (of step 4) into position through back of gun body assembly.
Tighten gland nut.
7. Reassemble items 15 through 19.

TO REPLACE PACKING (10)

1. Remove cartridge assembly following steps 1-4 under "To Replace Cartridge Assembly."
2. Locate slot in packing gland (10), pry apart and push off.
3. Replace with new packing gland, and reassemble.

TO ADJUST PACKING GLAND (10)

1. Shut off power supply to pump and release pressure from gun. Remove gun from hose.
2. Use a 7/16" open-end wrench to turn gland nut clockwise to eliminate any leakage at gland.
3. If sluggish trigger operation is noted, turn gland nut counterclockwise in 1/16 turn increments until drag is eliminated.
4. If leakage cannot be stopped without excessive drag on trigger, replace packing.

TO REPLACE SEAT (6)

1. Shut off air or power supply to pump and release pressure from gun. Remove gun from hose.
2. Remove tip guard assembly (1) and nozzle tip and gasket (2).
3. Remove nut diffuser and attached parts (3, 4, 5, 6, & 7). Unscrew seat retainer (7) from nut diffuser (3). Seat should drop out.
4. Reassemble in reverse order.

DIFFUSER ASSEMBLY ACCESSORY

Reduces fluid velocity to minimize tip wear and make tip removal safer.

Also to aid fluid filtration.

Order 54-2229 nylon gasket with set-up, described below.

54-2378 nut for use with 54-1835 (.005) or 54-1836 (.009) edge type filter.

54-2378

Binks TWIST-TIP REVERSIBLE NOZZLE CLEANER

GENERAL

The Twist-Tip Nozzle Cleaner allows purging of a clogged nozzle orifice without disassembly from the spray gun. The tungsten carbide nozzle is permanently assembled into the rotatable cylinder tip insert and handle assembly. No alignment or adjustments are required.

ASSEMBLY

Assembly to spray gun is simple. Please refer to the detailed assembly instructions on page 7. The exploded view at right is for part ordering reference.

FEATURES OF THE TWIST-TIP ATTACHMENT

- Fits most popular airless spray guns
- Low friction turning
- Equals or exceeds life of other reversible spray tips
- Hand-tightened seal system
- Assembly suitable for solvent and water-based
- Maximum working pressure: 7,500 PSI
- Rapid changing of the tip and base by hand without tools

IMPORTANT OPERATING INSTRUCTIONS

1. The spray gun must be shut off while rotating the Twist-Tip attachment handle.
2. If leakage occurs, unit must be disassembled, cleaned and parts checked for any damage. Replace damaged parts with genuine Binks parts.

⚠ WARNING

Do not operate unit with leakage from the spray gun, Twist-Tip attachment or hose or severe injury may result.

3. With proper care, the Twist-Tip attachment will give long, reliable service. To maintain this performance, it should be flushed with solvent or proper cleaning fluid following each spray period.

**SEE PAGE 7 FOR
DETAILED ASSEMBLY INSTRUCTIONS**

PARTS LIST

When ordering, please specify Part No.

ITEM NO.	PART NO.	DESCRIPTION	QTY.
1	454-3	SAFETY GUARD ASM.....	1
1	454-5	SAFETY GUARD (G Thread) ASM	1
2	454-1	(Part of Safety Guard)	1
3	454-Tip Size	SPRAY TIP	1

Binks AIRLESS 1 SPRAY GUN: TWIST-TIP REVERSIBLE NOZZLE CLEANER

⚠ WARNING

NEVER hold gun trigger when replacing tip. Always remove fingers from trigger and HOLD BY GUN HANDLE ONLY. NEVER attempt to rotate/remove/change tip when device is pressurized and or when gun trigger is depressed. ALWAYS engage trigger safety whenever removing cylinder tip assembly.

MAINTENANCE/CLEANING

1. Cleanliness is important to assure trouble-free operation. Excessive purging can indicate a need for paint filtering and/or service of existing filter.
2. Flush unit after each use, and before any expected downtime. Adjust unit fluid pressure to lowest possible setting.
3. To store unit: Clean, disassemble and store dry.

AIRLESS TIP SELECTION

Proper Selection: Determined by fluid flow desired and the spray pattern fan width required for the specific job. Selected size should supply the desired amount of fluid and pattern width with proper atomization and yet not exceed the capacity of the fluid supply.

Viscosity: Viscosity can be used as a guide and generally smaller orifice tips are desired for “light” viscosity fluids. For heavy viscosities larger orifice tips are preferred. The chart below indicates orifice sizes with appropriate fluids.

Orifice Size	Material
.011 to .013	Lacquers and Stains
.015 to .019	Oil and Latex
.021 to .051	Heavy-Bodied Latex and Block Filler

FAN WIDTH

Fan width is dictated by the job at hand, and personal selection. However, an 8" to 12" pattern is preferred by most painters and offers more spray control while less likely to plug. A 14" to 16" pattern may find favor with a more experienced painter and offer greater production rates.

BASE RETAINERS

Assembly Number	454-3 3/4 – 20 Binks	454-5 7/8 – 14 (G) Graco, Titan, Wagner
-----------------	----------------------------	--

Ordering: For twist tips add the prefix 454- to size tip selected. For example, if you select 517, order as 454-517.

Binks AIRLESS 1 SPRAY GUN: TWIST-TIP REVERSIBLE NOZZLE CLEANER

1

Rotate PART B as shown and insert into the 7/16" diameter opening in PART C.
Note: PART B will not fit unless rotated.

2

While keeping PART B inside PART C, rotate PART B back to its original facing (beveled opening facing forward).
Must return to this facing

3

Using a pen to hold PART B in place, insert PART A (flange side out) into PART B. Press PARTS A & B together firmly.

4

Slide PART F onto the groove on PART D.
PART F must have the "top" side up. Please refer to the diagrams above which show the difference between the top and bottom sides of PART F.

5

Insert the A/B/C assembly into the E/F assembly, making sure the 7/16" diameter opening faces up.

6

Rotate PART E clockwise 90° as shown so that its flange aligns with the opening in PART F.
 Insert PART E into the assembly.
 Rotate PART E counter-clockwise 90° to complete the Twist-Tip.
Rotate 90°
Flange must align with matching groove of PART F
Rotate 90°

WARRANTY

This product is covered by Binks' 1 Year Limited Warranty.
